Company Profile

ERP Software Solutions for Textiles

Set your company on course – with Intex

The Company

Intex Consulting GmbH is an ERP (Enterprise Resource Planning) solution provider for the textile industry located in Wuppertal/Germany. Since our founding in 1995, we have been able to acquire well-known companies as long-term customers. The extended management team has more than 20 years of professional experience in this industry.

Due to our dynamic growth, we have attained a leading position on the international market as well and run our own subsidiaries in Brazil, China, India and Thailand. In addition, we have built a co-operation network with industry known and internationally operating partners. We are a global SAP partner as well.

We offer not only the software but also solutions and improvement suggestions for complex textile scenarios. The intex system is designed to enable a fast reacting, flexible and innovative textile company. This gives you the competitive edge on the market.

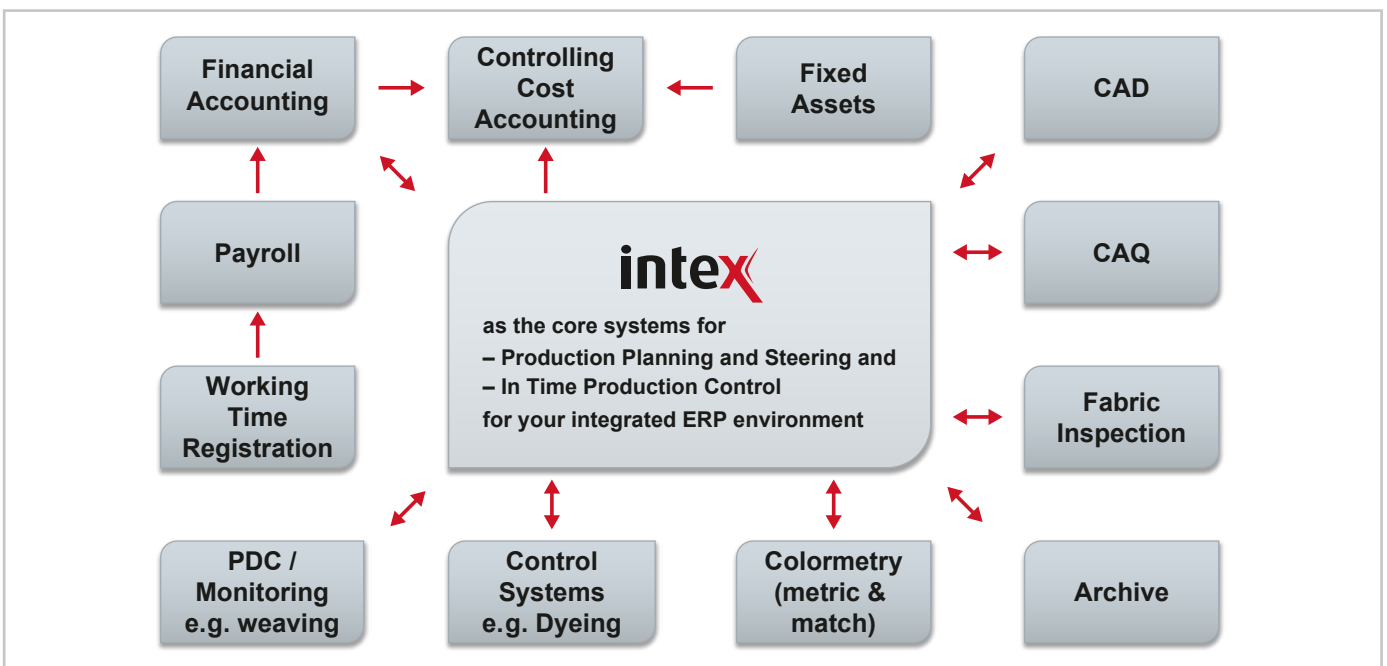

Our Range Of Services

Intex Consulting GmbH develops business software solutions that make a contribution to further enhance your competitiveness as a modern textile company. We integrate these solutions into your existing organizational and technical environment. This way we secure your investment in existing applications and create perspectives for a new and comprehensive ERP solution.

We believe in specialization and have focused our company activities and know-how specifically on the textile manufacturing industry. With this specialization, we want to become your preferred partner for your business software solutions.

Our core product is the integrated standard 'intex ERP' business solution. Being a complete solution for the thorough and transparent illustration of commercial and technical processes, **intex** is an ideal solution for textile manufacturers.

Integration

intex ERP Suite

intex is a modern ERP business system (standard software) for the textile industry, with fully integrated modules across the business departments.

In addition, our ERP solution is extended with our own optional modules for Plant Data Collection (PDC)/ In Time Production Control Level.

Such scalability in our solution enables seamless data and information flow from the Shop Floor to the Board Room, providing you with reliable and actionable information.

Our PDC solutions also save costs for interfaces and for maintaining different shop floor monitoring systems.

The unique features of intex – your advantages

- Transparency and reliable information (internal and external) with '360° view' towards your partner extends your service level
- Optimized and reprocessed process-flow attains less lead- and reaction time
- Transparent cost structure leads to effective controlling
- Reduced material consumption and stocks empowers to lower capital lock up
- Improved efficiency and resources allocation meliorates your profit
- Ongoing quality assurance through all process- and logistic areas reduces returns and claims

intex enhances your competitiveness in a global business environment.

intex All-in-One designed for SAP®-ERP

intex All-in-One: Textile core competence, experience and highly qualified consulting services combined with the ERP solution of world-market leader SAP.

With this successful partnership, intex further extends its position as the leading ERP provider in the textile industry. In collaboration with SAP Intex Consulting developed an integrated SAP based solution for the textile industrie called "intex All-in-One". The result is an ERP business suite that supports all processes of the textile planning and production.

This software solution is based on the existing modules of SAP ERP ECC 6.0, enhanced by textile-specific modules and functions of the intex MES (Manufacturing Execution System) and shop floor management via the PDC (Plant Data Collection).
