

Intex Consulting announces strategic partnership with PT Kawan Era Baru to optimally consult the Indonesian textile industry

www.indointertex.com

Indo Intertex 2017, Indonesia International Textile and Garment Machinery & Accessories Exhibition, 19th to 21st April 2017, Jakarta International Expo, Jakarta, Indonesia

Intex Consulting Group looks forward to welcome interested guests at our booth No.Hall A2-111 at Indo Intertex 2017!

Indonesia as a steadily growing textile industry market is fighting the same challenges as others. The demand of short lead times, highest quality standards of products, reliability towards the given lead times to the customer and the transfer of knowledge in case of staff fluctuation are challenges in the day to day business. As Intex Consulting is offering its process optimizing and consulting services along with the globally unique and natively developed ERP- and MES-Software – the “Intex ERP Business Suite” has a demand in Indonesia. Intex Consulting offers the only software suite dedicated to the textile manufacturing industry (across the textile value chain) with only one common and centralized database. Having these unique capabilities of offering one system without any interface disruption or breakages is not only unique – it is also the only way a consistent data flow can be guaranteed.

As Intex Consulting has two customers currently under implementation in Indonesia, the partnership with PT Kawan Era Baru, a renowned textile machinery and testing equipment agency, is planned for the long term expansion of Intex Consulting in Indonesia.

“We chose Intex Consulting as ERP- and MES-Software solution experts in the textile industry as our partner because from our evaluation there is no other software existing which could provide the textile specific functionality that intex offers. For PT Kawan Era Baru it is a very promising partnership as we are convinced that the offerings of Intex Consulting in terms of service, know how and software are the best available for textiles globally. The Indonesian textile industry needs the support of such senior experts in the industry to catch up with European standards in terms of quality and reliability of software systems.” (Aditya Suryaman, KEB).

“We are currently in the final phase of the implementation of Intex ERP Business Suite in our company. From our research before, we know, that there is no other provider existing which has such detailed knowledge and understanding of textile processes, which are as well reflected in the software. Luckytex is very happily looking forward to the Go Live. From our belief in having chosen the best available supplier, we are convinced that Intex Consulting will expand its business in the Indonesian textile sector very successfully.” (Ms Lily Tamin, Luckytex).

Intex Consulting GmbH is a consulting and software company, headquartered in Wuppertal/Germany offering ERP solutions for the textile industry. Since our founding in 1995, we have attracted a number of well-known customers and, based on such dynamic growth, we've attained a leading position in the market. This activity led to our establishing a cooperation network with global leaders like IBM and SAP. Our company is exclusively owned by our own staff. A long-term strategy and a solid equity base is in place to hedge our further growth. Professional competence and reliability are the key points in the cooperation with our customers. We ensure the high standard of software and implementation projects with modern development tools, training of staff and quality management projects. We continually check new technologies, economic concepts and optimization potentials on textile processes in order to be able to meet the high demands of our customers now and also in the future.
