

# ERP Software Solutions for Textiles

Munich, 13 – 20 September 2007

## Follow-up to the ITMA exhibition – 'Place for Innovation'

### Updated Customer Information

Dear customers, partners and interested visitors,

In the follow-up to the ITMA exhibition, we are sending you our global Intex newsflash. On occasion of the 15<sup>th</sup> ITMA, 118'000 visitors from 149 countries (record!) came to meet 1'450 exhibitors from 38 countries. For 45% of the visitors, this was their first trip to the ITMA.

Intex noted a record number of visitors as well (+ 20%). Which was also caused by this being the first exhibition together with SAP and by the size and location of our booth. The joint advertising also contributed to the success of the fair, like e.g. in the ITMA exhibition newspaper and online in the TW network (Textilwirtschaft).

According to the exhibition slogan 'Place for Innovation', we demonstrated our outstanding strength in production planning and processing. This improves the transparency of your business processes and increases the efficiency of your mill.

Changes of great importance mark the year 2007 and our long-term strategy. We are convinced, that this will have positive impacts not only for us, but also for you, our customers, partners, and prospects.

From now on we want to inform you regularly about news, developments, resumes and important events. The hyperlinks in the newsflash will directly link to our website. There you can get more global information.

The experience of the fair shows, that production planning and processing in the textile manufacturing are still the main requirements to an ERP software. The new functions and enhancements in **intex** were noted with high interest by the visitors. Especially the

- Order Network, which we consider as a unique selling point of **intex**

Further exhibition-highlights:

- Pareto diagrams and online standard reports
- Improved user interface in 'Windows VISTA look'
- Browser-based HTML-Client
