

ERP Software Solutions for Textiles

Shanghai, 27 – 31 July 2008

Intex presents its Asian network at ITMA ASIA

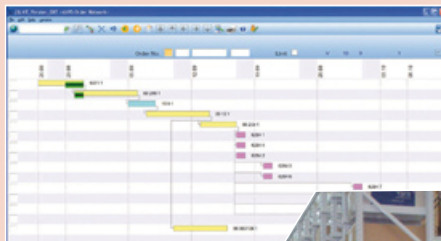

Dear customers, partners and exhibition visitors,

The Asian textile market is still a rising industry – in no way is its sun setting. Successful managers have to focus on reinventing and innovating efficiency by increasing productivity and competitiveness. As one possible result, textile mills are set to launch their own trade labels and provide customer-specific products with a higher variety of article stages while trying to boost minimum order quantities.

All Asian subsidiaries together with the German headquarters will attend the ITMA ASIA. At our booth we will demonstrate our innovative 'ERP Software Solutions for Textiles' which are designed to set new standards in productivity and lift profits throughout the textile chain.

Learn more about our outstanding features for the handling of production planning and processing such as

- Order network
- Integrated monitoring and planning boards
- Quality inspection with touch screen
- Warehouse online scanning

intex offers a wide range of options to help increase profitability by optimizing your processes and making them more transparent. Not only is intex an ERP Software, but also a solution that includes a highly qualified consulting service for textile manufacturers. As a result, Intex has become a strategic SAP Channel Partner for the textile industry. The sales of 'SAP All-in-One intex' have started in Europe and are going to be extended to other continents.

Would you like to find out more? Please visit us at ITMA ASIA or contact us by phone or e-mail.

Best Regards,
Your Intex Consulting Group
